📄 [frantz-roulet-2128195a](https://frantz-roulet-2128195a.github.io)

## Skills

**Cloud / DevOps** Kubernetes, Azure, CI/CD pipelines with GitHub Actions, GitOps practices, Docker Swarm, Ansible, IaC, automation scripting

**Software Engineering** Python, C#, Go (basics), Agile methodologies, collaborative development workflows with Jira and Git, API integration

**Web / AI Solutions** React, Django (Python), .NET Core, RESTful APIs

**Mobile Development** Android (Java), Xamarin (C#), mobile backend integration, secure authentication flows

## Summary

I'm a DevOps engineer with more than 9 years of experience.

I've successfully delivered projects ranging from setting up infrastructures for small businesses to managing complex cloud environments and automating application deployments.

I'm passionate about optimizing methods to tackle challenging problems and always eager to learn and master new technologies and tools to achieve my goals.

I'm a dedicated team player who also thrives when working independently.

## Work Experience

### Mobile Industrial Robots

Odense, Denmark

DEVOPS ENGINEER

April 2022 - Now

- Maintain a Docker Swarm-based cluster managing build pipelines and artifact storage
- Supported an international team of over 150 developers with DevOps tools and processes, enhancing their autonomy in software building and delivery
